STOCKS OF LEAF TOBACCO OWNED BY DEALERS AND MANUFACTURERS 1/2/
Total stocks of leaf tobacco higher than a year ago.

Leaf tobacco stocks in the United States and Puerto Rico totaled 5,006 million pounds as of January 1, 1971, based on the quarterly reports of dealers and manufacturers. This is an increase of 66 million pounds when compared with the previous January 1.

Marketing by growers of the 1970 crop prior to January 1 was approximately 1,680 million pounds representing 88 percent of estimated production.

Stocks as of January 1 included about 1,371 million pounds of leaf tobacco under Government loans, an increase of 115 million pounds from a year ago.

Loan stocks as of January 1, 1971 were divided as follows: flue-cured, 847.3 million pounds; burley, 486.5 million; fire-cured, 10.8 million; dark air-cured, 18.5 million; and cigar leaf, 7.9 million pounds.

^{1/} Figures quoted for type totals in this summary are the farm-sales-weight equivalent of reported stocks. (See table in body of report for reported weight basis.) This report is issued quarterly.

^{2/} All Government loan stocks are reported by grower cooperatives, which are considered dealers for stocks-reporting purposes.

CIGARETTE LEAF STOCKS

Flue-cured and burley higher: Maryland and imported lower.

Stocks of <u>flue-cured</u> tobacco totaled 2,504 million pounds on January 1, 1971--an increase of 61 million from last January 1. Final producers sales of the 1970 crop are estimated at 1,178 million pounds, about 128 million above last season. Note: Significant revisions have been made in flue-cured stocks for all quarters in 1970. These appear in all tables.

Burley inventories this January 1 totaled 1,654 million pounds--66 million above the stocks of a year ago. Producers sales on the auction markets prior to January 1 this season were approximately 470 million pounds and represented about 84% of the crop.

Maryland stocks on January 1, 1971 were 50 million pounds--17 million below a year ago.

^{1/} Types 11-37 are reported on the basis of packed weight.
2/ Farm-sales-weight equivalent based on unstemmed sweated weight factor.
3/ The instructions for reporting unstemmed cigar-leaf of the domestic types require that dealers and manufacturers indicate the weight basis on which the tobacco is reported, namely, farm-sales-weight, marked weight, or sweated weight. The stocks are converted to the farm-sales-weight equivalent on the basis of average factors reflecting the percentage reported each quarter in each of these three categories.

^{1/} Totals include stocks of leaf reported in tobacco sheet. See separate reporting in table 4.

2/ Type 73 is defined as all domestic types of tobacco not otherwise classified; the bulk of the stocks reported in this type consists of cuttings, clippings, and trimmings. This is the result, in most instances, of the inability of reporters to designate cuttings, clippings, and trimmings in the types to which they properly belong.

3/ In previous quarters these tobaccos were grouped together and designated type 90. The increasing volume of imported flue-cured and burley leaf made separate reporting necessary.

^{1/} Total includes stocks of leaf reported in tobacco sheet. See separate reporting in table 4.
2/ These statistics represent the quantity of leaf tobacco reported as owned by all leaf tobacco dealers, manufacturers, quasi-manufacturers, growers' cooperative association, warehousemen, brokers, holders, and owners subject to provisions of the Tobacco Stocks and Standards Act approved January 14, 1929, and the amendments thereto passed in the 72nd and 74th Congress. The quantities owned by dealers and manufacturers have been tabulated separately on a type total basis.
3/ This table should be considered as representing only the approximate quantities owned respectively by dealers and manufacturers. The quantities shown as owned by manufacturers represent domestic manufacturers only. All Government loan stocks are dealers' holdings.
4/ Includes stocks on the Island of Puerto Rico.
5/ For explanation of stocks included in this classification see footnote 2 on page 7.
6/ In previous quarters these tobaccos were grouped together and designated type 90. The increasing volume of imported flue-cured and burley leaf made separate reporting necessary.
